

Backflow Assembly Repair Workshop

This Seminar is designed to teach **certified backflow testers** the skills needed to repair backflow prevention assemblies. A detailed presentation on how to repair all models of backflow assemblies will be conducted. Assemblies will be shown in a live demonstration. The old as well as the new assemblies will be presented. A repair outline will be established to organize your repair processes for all sizes and types of backflow assemblies.

Jim Purzycki

Jim is owner of BAVCO one of the nations largest wholesale distributors of backflow prevention assembly repair parts and accessories.

Jim holds two Bachelor of Science degrees from CA State University at Long Beach in Management and Finance.

Jim has been a licensed backflow prevention assembly tester / repairer and plumber for the last 30 years.

Jim spent the first 10 years of his career working as a backflow prevention assembly tester and repair technician. His duties required the annual testing and maintenance of over 3000 backflow assemblies annually.

The last 20 years he has served as Manager of BAVCO. In his duties he has provided training and education in the development, implementation and running of Cross Connection Control Programs across the United States.

Jim sits on many committees for many nationally recognized organizations including:
American Backflow Prevention Association - ABPA
American Water Works Association - AWWA
Irrigation Association - IA
National Rural Water Association - NRWA
And many regional Cross Connection Control groups around the country.
